

Amendments to the Claims:

1-70. (Canceled)

71. (Currently amended) A particulate recombinant Staphylococcal enterotoxin B (rSEB) vaccine composition made by a method comprising:
atomizing a liquid rSEB formulation to produce an atomized formulation,
freezing said atomized rSEB formulation to form solid particles, and
drying said solid particles to produce discrete dried particles of said rSEB vaccine composition, wherein at least about 50% of the discrete dried particles have a volume diameter within about 80% of the mean.

72-75. (Canceled)

76. (Previously presented) The vaccine composition of claim 71, wherein said discrete dried particles have a volume mean diameter of between about 35 μM and about 300 μM .

77. (Previously presented) The vaccine composition of claim 71, wherein said discrete dried particles have a volume mean diameter of between about 50 μM and about 100 μM .

78. (Canceled)

79. (Previously presented) The vaccine composition of claim 71, wherein said discrete dried particles have a mean aerodynamic diameter of between about 8 μM and about 140 μM .

Appl. No.: 10/783,061
Amdt. dated March 6, 2008
Reply to Office Action of September 11, 2007

80. (Previously presented) The vaccine composition of claim 71, wherein said discrete dried particles have a mean aerodynamic diameter of between about 20 μM and about 70 μM .
